Work History

Contract Web Development(2010 to Present)

Over the past few years I have built, managed, and helped develop around a dozen web apps and sites. I have done everything from designing a front end to developing and launching entire sites, front and back end.

Tools: WordPress, Ruby on Rails, Tumblr, Heroku, AWS, Dreamhost, HTML, CSS, Javascript, Git, MySQL, PostgreSQL, Apache, Unicorn, Passenger, Adobe Creative Suite.

Mars Hill Church(2011 to 2012)

Web Development Intern,

At Mars Hill I collaborated with the web team using agile practices to build web apps, some of which produce 45 thousand hits per day and 1.4 million unique visits.

Stack: Ruby on Rails, HTML, CSS, SASS, jQuery, GIT, and MySQL.

Startup Weekend First Place(2012)

In 54 hrs a small team and I built an app called Showr for an event called Startup Weekend. We iterated on the idea and development till we had a working prototype of the app on android, iOS and web browsers. I built the web app and worked with the mobile developers to build an API. We took First Place and the People's Choice award for best app/idea.

Up Time Technology (2006 to 2011)

Computer Tech/Production Manager,

I spent 5 years at Up Time, a small business filled with great people who love supporting small businesses. I collaborated with the team to run the helpdesk/support. I used troubleshooting and attention to detail to resolve complex technical issues that kept our clients happy and running.

I managed the production department and assets. I worked with software developers to design and build our in house order fulfillment system.

Education

Seattle Central Community College(2012 - 2013)

Web Development Certificate-

Programing and Design courses covered:

PHP, C# with .NET, Javascript, HTML, CSS, Networking, Unix Systems, database development, Wordpress and the Adobe Creative Suite.
