Work History

Mars Hill Church(2011 to 2012)

Web Development Intern,
Worked on the Mars Hill web team helping support their web apps, some of which produce 45 thousand hits per day and 1.4 million unique visits.
Stack: Ruby on Rails, HTML, CSS, SASS, jQuery, GIT, and MySQL.

Freelance Web Development(2010 to Present)

Over the past few years I have built, managed, and helped develop around a dozen web apps and sites. Doing everything from front to back end, design and development.

Tools:
WordPress, Ruby on Rails, Tumblr, Heroku, AWS, Dreamhost, HTML, CSS, Javascript, Git, MySQL, PostgreSQL, Adobe Creative Suite.

Up Time Technology (2006 to 2011)

Computer Technician,
Over 4 years in combined IT with excellent experience in helpdesk, technical troubleshooting, system crashes, slow-downs, virus infection, data recoveries. Utilized troubleshooting and attention to detail to resolve technical issues.

World Vision(2011 to 2012)

Computer Technician,
Working on Windows 7 Migration Project. which entailed: Lotus Notes updates to 8.5, and SCCM deployment of Windows 7.
